Text Books/ References Book:-

| Name of Authors | Titles of the Book | Edition | Name of the |
|---------------------|-------------------------------------|---------|-----------------|
| | | | Publisher |
| A Silberschatz, H.F | Database System Concepts | VI | MGH Publication |
| Korth, Sudersan | | | |
| C.J Date | An introduction to Database Systems | VI | Addison-Wesley |
| Elmasri & Navathe | Fundamentals of Database systems | VII | Pearson |
| Raghurama Krishnan | Database Systems | III | ТМН |

| COURS | COURSE OUTCOMES: Students will be able to | | | | | | | | |
|-------|--|--|--|--|--|--|--|--|--|
| CO1 | Understand the basic principles of database management systems and Draw ER | | | | | | | | |
| | diagrams to represent simple database application scenarios. | | | | | | | | |
| CO2 | Understand relations, keys, relational algebra and SQL and write SQL queries for a | | | | | | | | |
| | given context in relational database. | | | | | | | | |
| CO3 | Discuss normalization techniques with simple examples. | | | | | | | | |
| CO4 | Describe transaction processing and concurrency control concepts. | | | | | | | | |
| CO5 | Learn the various systematic database design approaches | | | | | | | | |

Programme:- MCA

Semester - II

wef: July 2022

| Name of Paper | Paper Code | Practical | | | | | |
|------------------------|------------|-----------|---|-------|-----|-------|--|
| Name of Taper | Taper Code | Credit | | Marks | | | |
| Programming Lab in C++ | MCA-207 | Р | J | ESP | САР | Total | |
| | | 8 | 0 | 120 | 80 | 200 | |

Content:

- 1. Simple C++ programs to implement various control structures.
 - if statement
 - switch case statement and do while loop
 - for loop
 - while loop
 - Array
- 2. Write a program Illustrating Class Declarations, Definition, and Accessing Class Members
- 3. Write a C++ Program to illustrate default constructor, parameterized constructor and copy constructors
- 4. WAP to find the largest of three numbers using inline function.
- 5. Given that an EMPLOYEE class contains following members: data members: Employee number, Employee name, Basic, DA, IT, Net Salary and print data members.
- 6. Write a C++ program to read the data of N employee and compute Net salary of each employee (DA=52% of Basic and Income Tax (IT) =30% of the gross salary).
- 7. Write a C++ Program to display Names, Roll No., and grades of 3 students who have appeared in the examination. Declare the class of name, Roll No. and grade. Create an array of class objects. Read and display the contents of the array.
- 8. WAP to Illustrate Multilevel Inheritance.
- 9. WAP to Demonstrate Multiple Inheritances.
- 10. Write a Program to demonstrate friend function and friend class.
- 11. Write a C++ to illustrate the concepts of console I/O operations.
- 12. Write a C++ program to use scope resolution operator. Display the various values of the same variables declared at different scope levels.
- 13. Write a Program to illustrate New and Delete Keywords for dynamic memory allocation
- 14. Write a C++ program to allocate memory using new operator.
- 15. WAP to demonstrate template class
- 16. WAP to demonstrate template function.

| 1002 | Sejal Surat | 13 % | |
| 1004 | Miti London | 11 % | |
| 1007 | Rajesh Baroda | | 15 % |
| 1003 | Anand New Delhi | 10 % | |
| | | | |

SNUM : A unique number assigned to each salesman.

SNAME : The name of salesman.

CITY : The location of salesmen.

COMMISSION: The Salemen's commission on orders.

Customers

| CNUN | Λ | CNAME | CITY | RATING | SNUM |

| CNILIN | π. Λ | ious number | agaianad | to anoth and | tomon |

CNUM : A unique number assigned to each customer.

Programme:- MCA

Semester - II

wef: July 2022

CNAME : The name of the customer.

CITY : The location of the customer.

RATING : A level of preference indicator given to this customer.

SNUM : The number of salesman assigned to this customer.

Orders

ONUM AMOUNT ODATE CNUM SNUM

| | | |

| 3010 | 1309.95 10/06/9 | 7 2004 | 1002 | |
| 3011 | 9891.88 10/06/9 | 7 2006 | 1001 | |

ONUM : A unique number assigned to each order.

AMOUNT : The amount of an order.

ODATE : The date of an order.

CNUM : The number of customer making the order.

SNUM : The number of salesman credited with the sale.

Write queries :-

- 1. Produce the order no, amount and date of all orders.
- 2. Give all the information about all the customers with salesman number 1001.
- 3. Display the following information in the order of city, sname, snum and commission.
- 4. List of rating followed by the name of each customer in Surat.
- 5. List of snum of all salesmen with orders in order table without any duplicates.
- 6. List of all orders for more than Rs. 1000.
- 7. List of names and cities of all salesmen in London with commission above 10%.
- 8. List all customers whose names begins with a letter 'C'.
- 9. List all customers whose names begins with letter 'A' to 'G'.
- 10. List all orders with zero or NULL amount.
- 11. Find out the largest orders of salesman 1002 and 1007.

Programme:- MCA

Semester - II

- 12. Count all orders of October 3, 1997.
- 13. Calculate the total amount ordered.
- 14. Calculate the average amount ordered.
- 15. Count the no. of salesmen currently having orders.
- 16. List all salesmen with their % of commission.
- 17. Assume each salesperson has a 12% commission. Write a query on the order table that will produce the order number, salesman no and the amount of commission for that order.
- 18. Find the highest rating in each city in the form : For the city (city), the highest rating is : (rating)
- 19. List all in descending order of rating.
- 20. Calculate the total of orders for each day and place the result in descending order.
- 21. Show the name of all customers with their salesman's name.
- 22. List all customers and salesmen who shared a same city.
